We've never been in this situation before - either in our lifetimes, or in the history of our nation and the world, when we have been in such great danger because of the mental instability of the person in charge of the U.S. government. A panel of distinguished academic speakers, each the top in their fields, aims to provide a much-needed rigorous, interdisciplinary discussion. Experts will analyze the situation through the lenses of: law, history, political science, economics, social psychology, atomic science, and environmental science.

We invite reporters, lawmakers, students, and the public to join us.

A reception will follow, celebrating the release of the expanded edition of the *New York Times* bestseller, *The Dangerous Case of Donald Trump: 37 Psychiatrists and Mental Health Experts Assess a President*.

Organizers:

Bandy X. Lee, MD, MDiv
Forensic psychiatrist at
Yale School of Medicine and
editor of *The Dangerous
Case of Donald Trump*.

Jerrold M. Post, MD
Former CIA psychiatrist and
director of the Political
Psychology Program at George
Washington University.

Jeffrey D. Sachs, PhD
Economist and director of the
Center for Sustainable
Development at Columbia
University.
